DETAILED ACTION

Election/Restrictions

Applicant's election of Groups III and I, and Species II, Sub-species ii in Paper No. 11 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 9-10, and 16-24 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 11.

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Page 3

Art Unit: 3738

Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear what is actually being claimed; a polymer-ceramic composition, the polymer of a polymer-ceramic composition or just a polymer. It is assumed for purposes of examination that the Applicant meant to claim "wherein the polymer of the polymer-ceramic composition comprises..."

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6, 8 and 25-26 are rejected under 35 U.S.C. 102(e) as being anticipated by Lee et al. (6,027,742) as cited in Applicant's IDS. Lee et al. discloses a biocompatible implant for surgical implantation comprising: a matrix comprising a resorbable thermoplastic-ceramic composition (i.e. polymethylmethracrylate-ceramic, col. 12, lines 59-67), for enhancing bone growth adjacent the composition, wherein the

Art Unit: 3738

implant provides mechanical support for natural bone structure for a predetermined period of time to allow the natural bone structure to grow adjacent the material (col. 7, lines 46-52). The polymer, although poorly resorbable, is resorbable at a slow rate while the ceramic "growth-enhancing portion" resorbs at a faster rate (9 col. 12, lines 59-67). The ceramic includes a calcium source (apatitic calcium phosphate). The polymer-ceramic composition may include copolymers of polylactic acid and polyglycolic acid (col. 9, lines 36-63).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 11-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al. (6,027,742) as above in view of Vyakarnam et al. (6,534,084). Lee et al. discloses an implant comprising a thermoplastic material, that can be coated with a ceramic composition (col. 9, lines 34-35) however Lee et al. fails to disclose a specific porosity and pore size. Vyakarnam et al. teaches an implant having a porosity of 50-60% and pores sized between about 150 to about 400 microns, which would be similar to the naturally occurring structure (col. 5, line 66- col. 6, line 41). It would have been obvious to one of ordinary skill in the art to combine the teaching of an implant having a

Art Unit: 3738

porosity of 50-60% and pores sized between about 150 to about 400 microns, as taught by Vyakarnam et al., to an implant comprising a thermoplastic material as per Lee et al., in order to better approximate the naturally occurring structure.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al. (6,027,742) as above in view of Boltong (5,605,713). Lee et al. discloses an implant comprising a thermoplastic-ceramic material and a growth-enhancing composition, however Lee et al. fails to disclose the growth-enhancing composition comprising a transforming growth factor. Boltong teaches a ceramic composition comprising a transforming growth factor (TGF-beta) with the aim of stimulating bone growth (col. 5, lines 44-48). It would have been obvious to one of ordinary skill in the art to combine the teaching of a ceramic composition comprising a transforming growth factor, as taught by Boltong, to an implant comprising a thermoplastic-ceramic material and a growth-enhancing composition as per Lee et al., in order to stimulate bone growth.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas C. Barrett whose telephone number is (703) 308-8295. The examiner can normally be reached Tuesday-Friday between 9:00 A.M. and 6:00 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on (703) 308-2111. The fax phone

numbers for the organization where this application or proceeding is assigned are (703) 872-9306 for regular communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0858.

Thomas Barrett
